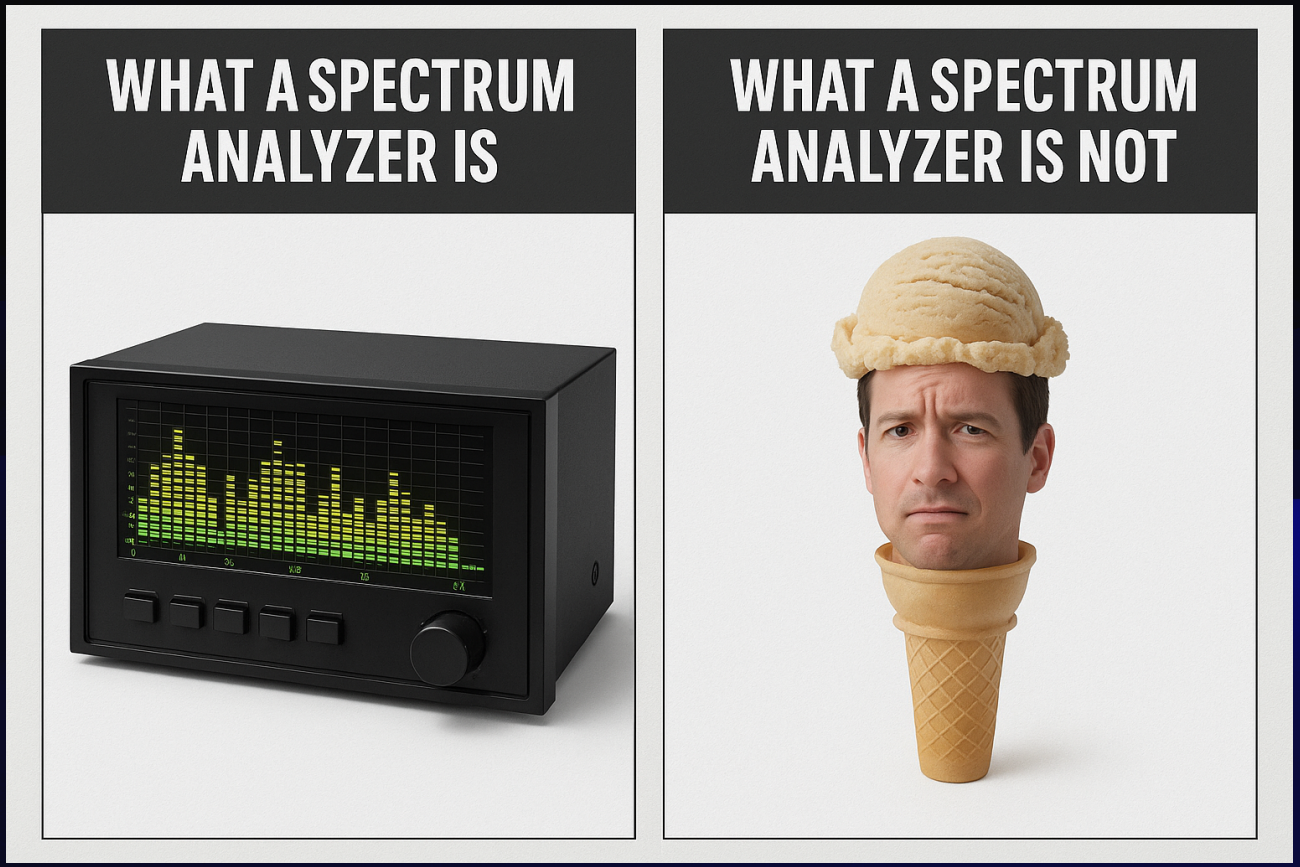
Hamina

What is a Spectrum Analyser?

A tool used to measure and visualize the electromagnetic spectrum



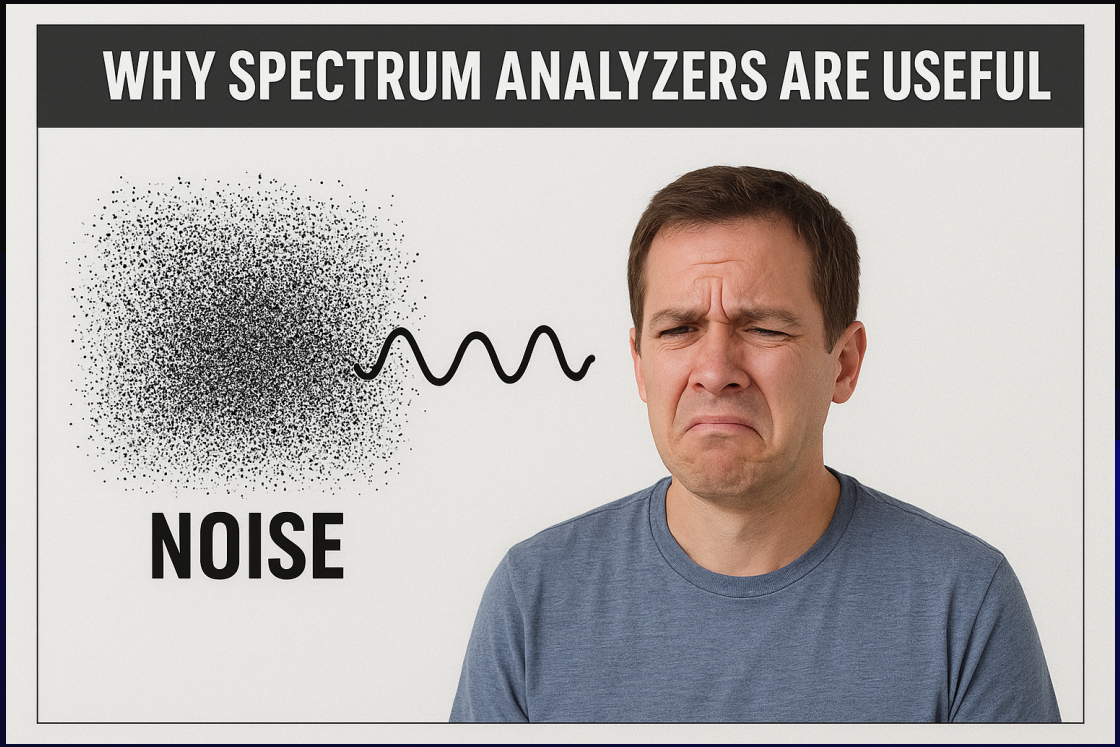
Hamina

Why are they useful?

Verifies that APs are not placed in areas with high noise floors or interference

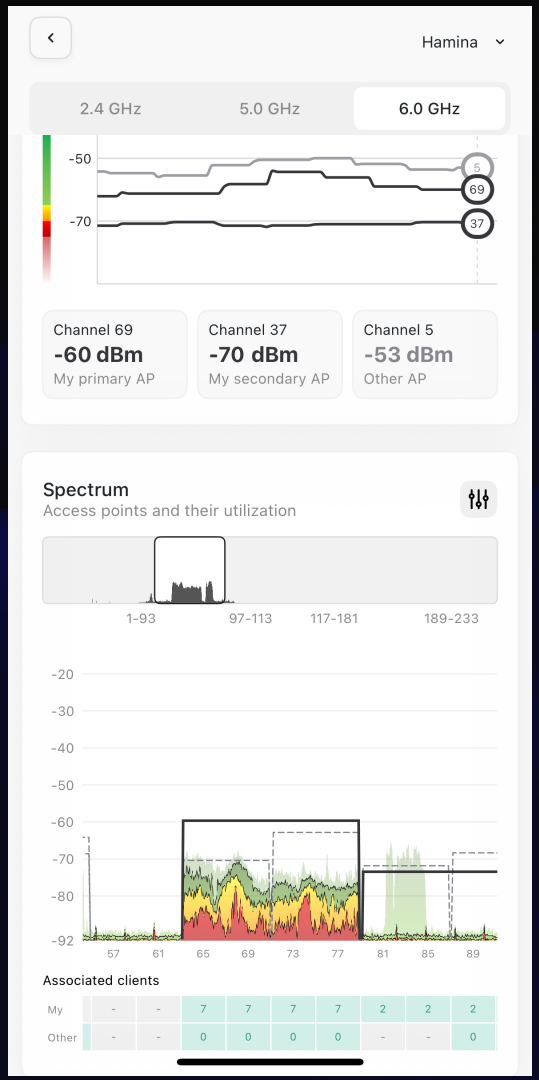
Identify hidden sources of noise

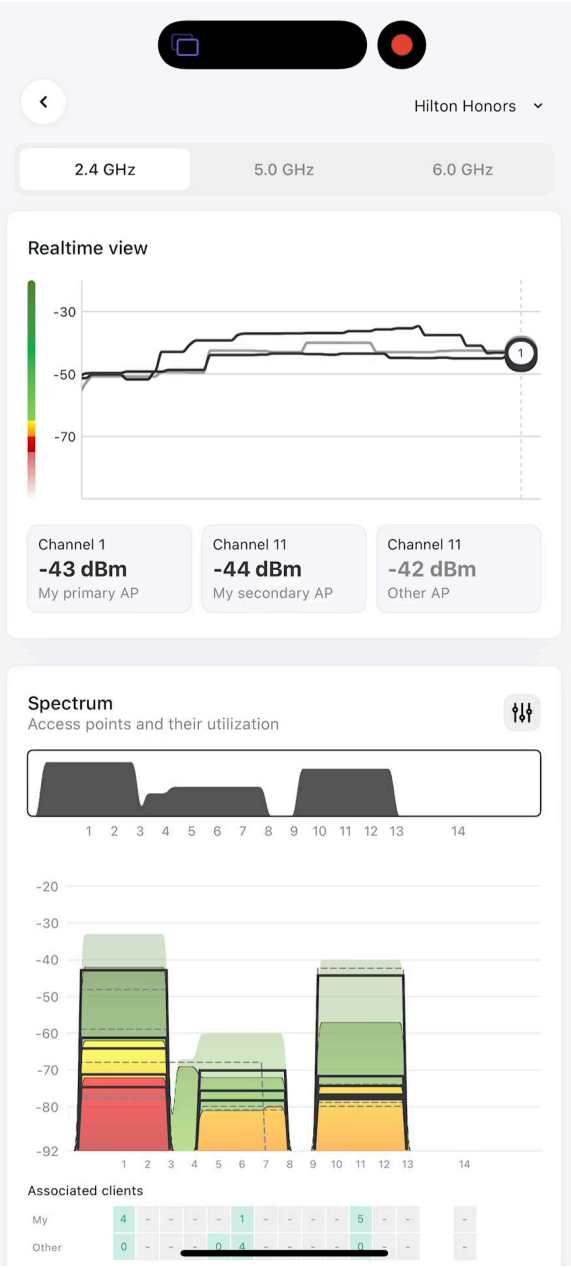
Measure the noise floor to understand signal-to-noise ratio (SNR), which is key to Wi-Fi quality



Hamina

How do you use that data?





Hamina

What do clients use?

Hamina

When do you NEED a Spec An?

Hamina

Who is Hamina Wireless?
